Teaching assistant, PhD. ALINA PUTAN

- Measuring the performance of economic entities using the variable cost method
- Measuring the performance of economic entities using the dashboard.
- The implementation of managerial accounting methods and their impact on the functioning of the business environment in Romania
- Control tools in the development of economic activity
- Accounting practices in the faithful presentation of the economic activity

Teaching assistant, PhD. IOANA-ANDREEA CIOLOMIC

Strategic Management:

1. Analysis of competitive strategies in a specific industry

Example: "Analysis of competitive strategies in the food retail industry in Romania: The case of Lidl vs. Kaufland"

Objective: To study differentiation strategies and cost leadership, analyzing the long-term competitive advantages of companies.

2. Implementation of sustainability strategies in multinational companies

Example: "Sustainability Strategies in Multinational Corporations: Coca-Cola Case Study"

Objective: Analysis of green and corporate social responsibility strategies and their impact on financial performance and reputation.

3. International market entry strategies for Romanian companies

Example: "International expansion strategies for Romanian SMEs: challenges and opportunities"

Objective: Identifying and evaluating effective strategies for entering foreign markets for small and medium-sized Romanian companies.

4. Analysis of innovation strategies in a technology company

Example: "Innovation Strategies in the IT Industry: Google Case Study"

Objective: To investigate how continuous innovation supports the competitive advantage and growth strategies of technology companies.

5. Evaluation of diversification strategies in a large company

• Example: "Diversification strategies and their impact on company success: Samsung case study"

• Objective: To study the benefits and risks associated with diversification into multiple markets or industries.

6. Cost reduction strategies in the context of economic crises

• Example: "Cost-cutting strategies adopted by airlines during the COVID-19 pandemic"

- Objective: To evaluate how companies adopt efficiency strategies in crisis contexts and their long-term effects.

The suggested topics are indicative. The student can also propose other topics in the field of strategic management.

Business Ethics:

1. Corporate Social Responsibility (CSR) and its impact on brand reputation
 - Example: Compare the CSR efforts of brands like Ben & Jerry's or Unilever with those that have limited or no CSR initiatives.
 - Aim: To evaluate how CSR initiatives influence consumer trust, brand loyalty, and long-term profitability.
2. The role of ethics in corporate governance
 - Example: Use corporate scandals like Volkswagen's emissions scandal or Wells Fargo's fraud case to assess governance failures.
 - Aim: To explore how ethical corporate governance can prevent scandals and enhance stakeholder trust.
3. Ethical Challenges in Supply Chain Management
 - Example: Analyze how Apple or Nike manage their global supply chains, especially regarding labor conditions and environmental sustainability.
 - Aim: To understand the ethical obligations companies have towards ensuring ethical supply chain practices.
4. The Ethics of Artificial Intelligence (AI) in Business Decision-Making
 - Example: Investigate the ethical implications of AI use in recruitment (e.g., Amazon's AI hiring tool that showed bias).
 - Aim: To assess whether AI can make ethical decisions and how businesses should address bias and accountability in AI systems.
5. Ethical Investing and the Rise of Socially Responsible Investment (SRI)
 - Example: Investigate how investment firms like BlackRock incorporate Environmental, Social, and Governance (ESG) factors into their portfolios.
 - Aim: To evaluate the role of ethics in investment decision-making and the impact of socially responsible investment on company performance.

Asoc. PhD. MIREL GLEVITZKY

1. Study on implementing instruments for signalling, managing and solving inconsistencies within the organization...
2. Ongoing improvement of quality by applying the Kaizen principles to the material flow (Gemba Manufacturing) and the informational flow (Gemba Services) in an organization
